# SUBJECT INDEX

Acetylcholine: effect on neurotensin neurones 33
release from hippocampus 137
release from synaptosomes 439
release inhibited by Botulinum toxin 439
Acetylcholine agonists: effect on dopamine neurones 539
Acetylcholinesterase: in brain of lamprey 131
Acyl group composition: of synaptic and non-synaptic membranes 69
Adenosine: lack of synergism with VIP on cortical neurones 461
transport in synaptosomes 483
Adenosine deaminase: effect on benzodiazepine binding 533
Adenylate cyclase: activation and involvement of α-chymotrypsin and trypsin 453
activation by proteases 453
Ageing: and noradrenaline release 13
Agonist binding: to nicotinic receptor 109
α-Methylserotonin: effect on cerebral activity 209
α-Methyltryptophan 209
Amino acids: in haemorrhaged-hypotensive and normotensive rats 293
Amino acid levels: in cerebrospinal fluid 25
Aminopeptidases: effect on enkephalins 375
Aminopeptidase inhibitors 369
effect on ANP 369
Analgesia: related to neurotensin and neuromedin N 361
Antinociceptive activity: induced by neurotensin 361
Arachidonate: incorporation into brain phospholipids 505
Arachidonate turnover: in slices and membrane of cortex 505
Astrocytes: nuclear proteins 513, 519
Astrocyte nuclear proteins: effect of ammonia 519
effect of ethanol 519
Astroglial cultures: glutamine synthetase 307
Atrial natriuretic peptide (ANP): degradation 367
degradation by brain membranes 367

Benzodiazepine binding: effect of purine enzyme inhibitor 533
Bestatin: effect on neurotensin and neuromedin N-induced antinociception 362
Bicuculline: insensitive to GABA binding in catfish neuronal membrane 125
Binding: of GABA to catfish membranes 125
Binding sites: for calcitonin and calcitonin gene-related peptides 323
Botulinum toxin: inhibits release of acetylcholine 439

$Ca^{2+}$: binding proteins 215, 225
Calcineurin 215
Calcitonin: binding sites in rat brain 323
Calcitonin gene-related peptide: binding sites 323
Calcium-activated protein kinase C 143
Calmodulin 215
c-AMP: uptake in rat brain 19
c-AMP uptake: effect of various drugs 19
Catfish: binding of GABA to neuronal membranes 125
Cerebrospinal fluid: amino acid levels 25
Cholecystokinin: concentration in brain regions after injection of picrotoxin 493
Cholecystokinin octapeptide sulphate: in rat brain 493
concentrations in different brain areas 493
Cholinergic neurones: destruction by kainic acid and effect of ganglioside $GM_1$ 475
α-Chymotrypsin: involvement in actuation of adenylate cyclase 453
Cognate terminology 434
Cultures: of oligodendrocytes 467
L-Cycloserine: effect on membrane fluidity 499
effect on membrane lipids 499

Denervation: regulation of insulin growth factors 401
Developing rat: glucose metabolism in spinal cord 73
Dialysis: measurement of dopamine metabolites 539
measurement of dopamine metabolites in freely moving animals 539
Dialysis: of brain 539
5,7-Dihydroxytryptamine: molecular mechanisms 273
neurodegenerative effects 279
physico-chemical properties 274
reactions with oxygen 277
Dipeptidylaminopeptidases: effect on enkephalins 375
Dopamine: effect of (6*R*)-L-*erythro*-tetrabiopterin 121
effect on neurotensin neurones 33
in different brain areas 203
metabolic compartmentation 203
Dopamine-β-hydroxylase: activity in cerebrospinal fluid of Parkinsonian patients 187
sandwich immunoassay method 187
Dopamine metabolites: in different brain areas 203
Dopamine neurone activity: effect of acetylcholine agonists 539

Endopeptidase 24-11: roles 387
Enkephalinase: effect on enkephalins 375
Enkephalinase inhibitor: kelatorphan 347
Enkephalin inhibitors 375
Enzyme immunoassay: for dopamine β-hydroxylase 187
(6*R*)-L-*erythro*-tetrahydrobiopterin: intracerebrally administered effects on dopamine and serotonin 121
Ethanol: effect on astrocyte nuclear proteins 519
effect on muscarinic receptors 447

Filters: binding of [$^3$H]8-OH-DPAT 97, 101
Forskolin: effect on noradrenaline release 13
Fractionation: of various brain components 69

GABA: binding to catfish neuronal membranes 125
GABA binding: insensitive to bicuculline in catfish neuronal membranes 125
γ-Hydroxybutyrate: distribution and turnover in brain regions 53
Ganglioside $GM_1$: effect on lesioned cholinergic neurones 475
Gene: of NCAM 252
Glia: prostacyclin/peptide formation 1
C-6 glioma cells: nuclear proteins 513
Glioma C6Bu-1 cells: effect of prostaglandin $D_2$ 5
glutamine synthetase 5
Gluconeogenesis: in leech ganglia 179, 163
Glucose: pathways for utilisation in developing rat spinal cord 79
Glutamate: release from cerebellar granule cells 155
Glutamate release: effect of various inhibitory amino acids 155

Glutamine synthetase: in astroglial cultures 307
developmental studies in hemispheres 307
induction in glioma cells 5
mRNA 307
Glutamine synthetase induction: effect of prostaglandin $D_2$ 5
Glycogen: control and localisation in leech ganglia 163
Glycogenolysis: in leech ganglia 179
Glycosylation: involvement of NCAM 254
Granule cells: glutamate release 155
Growth factors: related to insulin 397

Haemorrhagic hypotension: tyrosine concentrations 291
Hippocampus: release of acetylcholine from slices 137
Histamine: release from brain slices 193
uptake by brain slices 193
Histaminergic fibres: histochemistry 197
Histochemistry: localisation of serotonin- and histamine-containing fibres 197
Hypertensive rats: noradrenaline content and turnover in brain areas 315
Hypotension: plasma amino acids 291

Inhibitors: of enkephalin 375
Insulin: and neuromodulation 400
and related growth factors 397, 415
and repair of CNS injury 415
and synapse formation 401
distribution in CNS 398
effect on electrical activity 399
effect on feeding behaviour 399
effects on nervous system, neurite growth and regeneration 402
Insulin growth factors: degeneration and regeneration 401
Insulin-like growth factors 397
Insulin receptors 419, 427
Isoproterenol: effect on noradrenaline release 13

Kanic acid: lesions of neocortex 475
Kanic acid lesions: effect of ganglioside $GM_1$ on neurones 475
of cholinergic neurones 475
Kelatorphan: an enkephalinase inhibitor 347
[$^3$H]Ketanserin binding: effect on serotonin synaptic levels 85
*in vivo* studies 73

Lactate dehydrogenase: in various subcellular fractions 73
Lamprey: acetylcholinesterase forms in brain 131
Lead: effect on myelin $Na^+K^+$ATPase 39
effect on synaptosomal $Na^+K^+$ATPase 39
Leech ganglia: gluconeogenesis and glycogen localisation 163
glycogenolysis and gluconeogenesis 179
L-Leucine: sodium dependent uptake into synaptosomes 91
Lipids: effect of L-cycloserine on membranes 499
Lipid synthesis: effect of serum 467

Membrane fluidity: effect of L-cycloserine 499
Metalloendopeptidase: inhibitor of neurotensin 351
Metallopeptidases: effect on enkephalins 375
3-Methoxytyramine: brain concentrations dependent on method of killing 50
concentrations in mouse brain 47
1-Methyl-4-phenylpyridinium ion ($MPP^+$): effect on mitochondrian respiration 525
Microdialysis: measurement of dopamine and serotonin plus metabolites 121
Microvessels: prastacyclin/peptide interactions 1
Mitochondria: effect of $MPP^+$ on respiration 525
mRNA: for glutamine synthetase 307
mRNA coding for glutamine synthetase 307
Muscarinic ligand: [$^3$H]quinuclidinyl benzilate 285
Muscarinic receptors: effect of ethanol consumption 447
Muscarinic receptor complex 285
Myelin: in developing brain 40
$Na^+K^+$ATPase activity 39

NADPH-cytochrome *C* reduction: in various subcellular fractions 73
$Na^+K^+$ATPase: activity in synaptosomes 39
in myelin 39
in synaptosomes of developing brain 40
in various subcellular fractions 73
NCAM: biosynthesis in brain 251
gene 263
polypeptides 251
proteins 269
specific expression 256
Nerve growth factor: role in neurite growth and regeneration 397
Neurite formation: effect of growth factors 402
Neurite growth: effect of insulin and related growth factors 397
Neurochemical terminology 431
Neuromedin N: and analgesia 361
Neuromodulation: and insulin 400
Neuronal growth factors: effects outside the CNS 425
Neurones: nuclear proteins 513
Neuropeptides: and their peptidases 383
modulate transmitter-induced glucogenolysis 179
modulate transmitter-induced gluconeogenesis 179
Neurotensin levels: effect of drugs 33
Neurotensin neurones: influence of dopaminergic and cholinergic mechanisms 33
Neurotrophic factors: phosphorylation, protein kinase C 406
Neurotrophic growth factors: in development and CNS repair 415
Nicotinic acetylcholine receptor 109
Nicotinic receptor: channel opening 109
Noradrenaline—see also norepinephrine
changes with age 315
lack of synergism with VIP on cortical neurones 416
release from cerebral cortical slices 13
Noradrenaline release: in senescent rats 13
Noradrenaline turnover: changes with age 315
Norepinephrine—see also noradrenaline
Norepinephrine: isolation of uptake inhibitor 297
Normetanephrine: brain concentration dependent on method of killing 50
in mouse brain 47
Nuclear proteins: of neurones, astrocytes and glioma cells 513
Nucleoside: transporters 483
5′-Nucleotidase: from cortex 61
in various subcellular fractions 73
kinetic characteristics 61

Nucleus accumbens: neurotensin concentration 33

Olfactory tubercle: dopamine and metabolites 203
Oligodendrocyte enriched cultures 467
Oligodendrocyte marker enzymes: effect of serum 467

Parkinsonian patients: dopamine-$\beta$-hydroxylase activity in cerebrospinal fluid 187
Peptidases: of neuropeptides 383
various types 385
Peptidase inactivator: of neurotensin 351
Peptidase inhibitors: effect on substance P 386
Phospholipids: incorporation of arachidonate 505
of synaptic and non-synaptic membranes 69
Phosphoproteins: individual forms phosphorylated 150
Phosphoramidon: effect on ANP 369
Phosphorylation: involvement of NCAM 255
of individual phosphoproteins 150
Picrotoxin: systemic injection affects cholecystokinin octapeptide sulphate concentrations 493
Plasma: tyrosin levels 291
Prostacyclin: effect of vasoactive peptides on formation 1
formation in brain microvessels, endothelial cells and muscle 1
Prostaglandin $D_2$: effect on glioma cells 5
effect on morphology of glioma cells 5
induction of glutamine synthetase 5
Proteases: activation of adenylate cyclase 453
Protease inhibitors: of ANP 369
Proteins: of nucleus from different cells 513
Protein 65: in synaptic vesicles 337
Protein kinase C: activation by calcium 143
effect of neurotrophic factors 406
inhibition by BAY K8644 143
Purine enzyme inhibitors: effect on benzodiazepine binding 573

[$^3$H]quinuclidinyl benzilate: muscarinic receptor ligand 285

Receptor–agonist complex: isomerisation 285
Receptors: for calcitonin and calcitonin gene-related peptides 323
muscarinic form 447
of insulin 419
Regeneration: effect of insulin and related growth factors 397
regulation of insulin growth factors 401

Serotonergic fibres: histochemistry 197
Serotonin: effect of an analogue on the amine's formation 209
effect of (6*R*)-L-*erythro*-tetrahydrobiopterin 121
effect on myelin $Na^+K^+$ATPase 39
effect on synaptosomal $Na^+K^+$ATPase 39
Serotonin analogue—see p. 209
Serotonin synaptic levels: effect of [$^3$H]ketanserin binding 85
Serum: effect on lipid synthesis and expression of oligodendrocyte enzyme markers 467
Sodium fluoride: effect on noradrenaline release 13
Striatum: dopamine and metabolities 203
measurement of dopamine metabolites by dialysis 539
neurotensin concentration 33
Subcellular fractions of brain: distribution of various enzymes 69
Substance P: effect of peptidase inhibitors 386
Succinate dehydrogenase: in various subcellular fractions 73
Sulphation: involvement of NCAM 255
Synapse formation: effect of insulin 401
Synaptic vesicles: synaptophysin and protein 65 levels 337
Synaptophysin: in synaptic vesicles 337
Synaptosomes: cytoplasmic proteins phosphorylated 143
from *Torpedo* electric organ 439
of cerebral cortex 483
$Na^+K^+$ATPase activity and effect of lead and serotonin 39
release of acetylcholine 439
transport of synaptosomes 483
uptake of L-leucine 91

Tetraphenylboron: activator of membrane transporter 525
interaction with $MPP^+$ on mitochondrial respiration 525
Thiorphan: effect on neurotensin and neuromedin N-induced antinociception 362
Transporters: of nucleoside 483
Trypsia: involvement in activation of adenylate cyclase 453
[$^3$H]tyrosine: intravenous administration effect on dopamine incorporation 203
Tyrosine levels: in spinal cord and plasma 291
relationship to haemorrhage hypotension 291

Uptake: isolation of inhibitor for norepinephrine 297
of histamine in brain slices 193

Vasoactive intestinal peptide—see VIP
Vasoactive peptides: effect on prostacyclin formation 1
VIP: excitation of cortical neurones 461
lack of synergism with adenosine and noradrenaline 461
vasoactive intestinal peptide 461

Wistar Kyoto rats: noradrenaline content and turnover in brain areas 315

PRINTED IN GREAT BRITAIN BY A. WHEATON & CO. LTD, EXETER
